

Connect with the Countryside

At Forsythe Family Farms 2009 Inc., we believe it's important for everyone to know where their food comes from along with experiencing the diversity of nature found on our farm.

We aim to build upon the students' current knowledge of farming and food through engaging, fun, and hands-on activities that support multiple learning styles making their visit not only educational but also memorable.

We value and respect each student's interests and perspectives, fostering curiosity and wonder as they explore and learn during our guided farm tours.

We are committed to making our farm accessible for everyone. While some areas of the grounds may be uneven, most of the farm is accessible to visitors with disabilities.

We welcome children with special needs. Attendants supporting these children are free of charge and are not included in the standard supervision ratio of one adult per child.

Our goal is to have the children leave with a deeper appreciation and understanding of how farming and the rural community help them thrive – strengthening their connection to the food they eat and the products they use every day.
