

Come and explore our farm!

2026 Spring and Summer Tours

Our outdoor experiences aim to spark children's wonder and curiosity about farming and the natural world. Engaging, inquiry-driven, hands-on activities keep learning fun for all ages.

As students dig into the workings of our farm, they'll gain a deeper knowledge and understanding of where their food comes from, empowering them to make healthier food choices.

Our mission is to nurture the farming connection, highlighting the significance farms play in the student's everyday lives.

The "Nitty Gritty" of our Farm Tours

Activities in our Farming Foundations AND Farm and Forest tours incorporate the relevant curriculum objectives and customized to your students age and abilities.

Tours are available from May to November

highlighting the seasons on our farm. All our tours include a seasonal take-home item of what the children pick or plant.

Two and three-hour tours are available. Our most popular tour length is 3 hours. This allows the students time to fully enjoy all our farm has to offer including time for lunch and play. It also works well with bus schedules.

Farming Foundations (all ages)

2-hour tour - \$13.00 each+ HST

3-hour tour-\$14.00 each+ HST

Farm and Forest (grades 1 plus)

3-hour tour - \$14.50 each + HST

For adequate supervision - we allow one adult free for every 5 students (this includes teachers and assistants). Adults accompanying children with special needs are free.

To confirm your booking date - a deposit equal to the minimum charge of 20 students per group (a purchase order number if a TDSB school) is required.

Our tours are guided by enthusiastic farm educators experienced in making learning stick!

Our farm educators will greet you at your bus upon arrival. They will accompany your group for the entire tour, working closely with you to ensure that your tour aligns with your classroom objectives.

Tours proceed rain or shine!

Children and adults should dress for the weather conditions on the day of their tour. Our farm can be cooler, windier, and muddier than urban areas.

Hats, mitts, coats, and boots may be needed.

We spend as much time outdoors in the fresh air as possible. We keep in mind the children's well-being and safety.

On unfavorable weather days – some indoor lunch and activity space is available.

Nature breeds curiosity;
it helps to grow explorers
rather than robots.

It reminds us that we are part
of something bigger.
It grounds us, calms us.

STEPHEN MOSS

Take home more than memories – Take home delicious!

Our on-farm market can be an integral part of your tour. It shows your students the variety of seasonal, Ontario-grown fruits and vegetables available. Conversations about the difference between our market and a grocery store deepen the understanding of eating locally grown.

The seasons are evident in the produce available on our farm.

Our *farm market* is open for business during your visit.

From Farm to Tablet – **Enjoy our Online Farm Education Video Program**

Upon booking your tour you will receive links to our online educational videos [Lessons from the Farm](#), videos, 5 – 7 minutes long, which feature our farm sharing some of the key lessons we teach.

Viewing these lessons before you visit helps familiarize your students with the farm enhancing their comfort level when visiting us. Watching them after the tour provides a valuable review of the day they have spent exploring our farm. Resources and worksheets are also available for students to dig deeper into the concepts we covered.
